

Alligator SiloDOME®

*water silos cover
up to Ø 15.00 m*

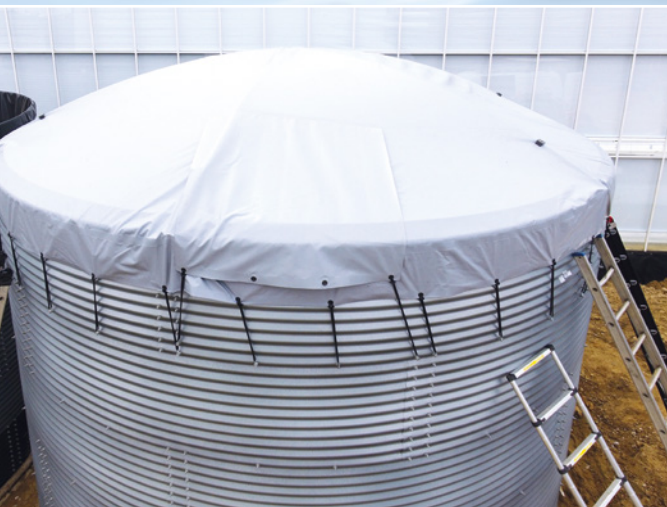

*A solid and reliable cover
for an interesting price.*

STRUCTURE

- Aluminum frame, tailor-made for every diameter water silo.
- Reinforcement rings are fitted depending on the diameter to limit the forces on the silo.
- Frame is supported by an aluminum pole.
- Cover in dense tissue-reinforced fabric, gray type PES / PVC RM 1 (0.70 mm thick, 900 gr / m²) or in open anti-algae fabric, black 210 gr / m².
- Possibly provided with a manhole to enter the silo.
- All around tensioned with elastics.

BENEFITS

- Construction is very light and, due to the well thought-out construction, gives a low load on the water silo.
- Frame is very light, no taps needed for mounting.
- Assembly can be done quickly with a small number of assistants.
- Water silo is always accessible through reinforced manhole in the cover.
- An affordable system for every horticulturist.
